

# Shrikant Patil

## Senior Software Engineer

Phone: +91-8888647404 / 9356660161 | Email: [shri.patil188@gmail.com](mailto:shri.patil188@gmail.com) | Location: Pune, India

## Professional Summary

Highly dedicated and detail-oriented **Senior Java Developer** with 8 years of comprehensive experience. Expertise in **Core Java (8/11/17)**, **Microservices** architecture, and the **Spring Boot** framework. Proven ability to **migrate legacy systems** (C++ to Java), integrate critical **third-party APIs** (Stripe, Twilio), and ensure high system availability using cloud platforms like **AWS**. Strong technical communication skills, focused on translating user problems into robust, production-ready solutions using **Agile** and **CI/CD** practices.

## Technical Skills

|                                        |                                                                                                      |
|----------------------------------------|------------------------------------------------------------------------------------------------------|
| <b>Languages &amp; Core Frameworks</b> | Core Java (8, 11, 17), Java Reactive Programming, C++<br>Spring Boot, Spring MVC, Microservices, TDD |
| <b>Cloud &amp; DevOps</b>              | AWS, AWS Lambda, Docker, Kubernetes, Jenkins, CI/CD                                                  |
| <b>Databases</b>                       | MySQL, MongoDB, MS SQL                                                                               |
| <b>Messaging &amp; Tools</b>           | Kafka, Splunk, AppDynamics, Grafana, MapStruct, Flyway                                               |
| <b>Testing</b>                         | JUnit, Selenium                                                                                      |
| <b>Web/APIs</b>                        | REST API, WordPress                                                                                  |

## Professional Experience

### Talent On Lease | Senior Java Developer (Client: Persistent Systems, Capital Market Domain)

Nov- 2025 – Present

- Modernized brokerage account service by migrating legacy modules to microservices architecture using Java 17 and Spring Boot.
- Implemented secure transaction workflows and optimized API orchestration for high-volume trading operations.
- Leveraged Kafka for real-time trade event streaming and caching strategies to reduce latency.
- Coordinated with client stakeholders to align technical solutions with capital market compliance requirements.
- Enhanced monitoring and logging using Grafana and Splunk for production reliability

### Mphasis Pvt Ltd. | Senior Software Engineer (Banking Domain)

May 2022 – Oct 2025

- Lead** the critical migration of legacy **C++** banking code to a modern **Java 17/Spring Boot** microservices architecture, utilizing **Java Reactive Programming**, **MapStruct**, and **Flyway**.
- Coordinated** directly with business users and stakeholders to finalize technical designs and requirements, ensuring alignment between development efforts and domain needs.
- Implemented** robust **JUnit** test cases across the application codebase, ensuring high code quality and application stability.
- Utilized Agile** methodologies and managed **CI/CD** pipelines using **Jenkins** for continuous integration and automated deployment.
- Monitored** production environment health and performance using tools including **Splunk** and **AWS** services.

### EyecareLive.Inc | Java Developer (Healthcare Domain)

April 2019 – May 2022

- Integrated** critical third-party payment and communication services, including **Stripe** and **Twilio**, into core platform APIs to enable digital vision care and virtual appointments.
- Designed and developed** scalable **RESTful APIs** for the digital eye health platform to support new product functionalities and partner integrations.
- Delivered** features using **Microservices** architecture, leveraging **Spring MVC/Boot**, **AWS Lambda**, and **MongoDB** for persistence in a US-based product environment.
- Managed** continued maintenance, bug fixes, and process migration updates for web applications to improve user experience and platform functionality.
- Wrote and maintained** comprehensive **JUnit** test cases to validate business logic and ensure application reliability.

### Rssquarz Tech Solutions Pvt Ltd | Software Developer (E-Commerce Domain) May 2017 –

October 2018

- **Developed** a full-featured Employee Collaboration Project, including modules for attendance tracking, task management, and bug reporting, using **Core Java** and **Spring MVC**.
- **Coordinated** with business users to gather and refine requirements, ensuring project deliverables met internal operational needs.
- **Utilized Selenium** for debugging and testing existing project functionalities.

## Education

---

**Shivaji University, Kolhapur**  
**State Board Of Maharashtra**
